EDUCATION

KLE Technological Univerity

Computer Science Bachelors

CGPA: 7.65

Hubli, India

Nov 2022 - Present

C. I. Munavalli Polytechnic

Computer Science Diploma

Percentage: 75.46%

Hubli, India

June 2019 - May 2022

EXPERIENCE

Mixedwash | Founder Office Intern

Bengaluru, India | May 2025 - Present

- Built a React + Leaflet dashboard to assign pickup/drop tasks with drag-and-drop and display live driver locations via OwnTracks + Firebase.
- Designed time-slot filters and admin toggles to manage task visibility, ETA routing, and real-time operations.
- Developed a WhatsApp chatbot (WATI + Apps Script) to automate customer onboarding, service booking, and order tracking.
- Handled API integrations and Postman testing; collaborated directly with clients to refine product features.

EmaxLabz Solution | Project Intern

Bengaluru,India | January 2025 - May 2025

- Built a Chrome Extension to automate freight load extraction from DAT and sync structured data to Google Sheets in real-time.
- Enabled multi-user login with client/admin panels, sheet isolation, and background syncing using Chrome Storage and Apps Script.
- Tested all API flows via Postman to ensure reliable backend-sync and fast load parsing with mimicked user interaction.
- Reduced manual workload by 80%, improving operational speed and sales team response time.

SKILLS

Programming Languages: c++, Python, Java, HTML/CSS, JavaScript

Libraries/Frameworks: React.js, Leaflet.js, Node.js, Express.js

Tools / Platforms: Git, VS Code, Postman, Firebase, Google App Scripts, Vercel

Databases: Google Sheet API, Firebase Real-time DB, SQL

PROJECTS / OPEN-SOURCE

Live Route & Task Dashboard

React.js, Leaflet.js, Firebase, Google Sheets API, OwnTracks

- Built a React + Leaflet dashboard to assign pickup/drop tasks with drag-and-drop functionality.
- Integrated Firebase Realtime DB + OwnTracks to show drivers live location every 60 seconds with auto-routing and ETA planning.
- Implemented time-slot filters (12 to 3 PM, 3 to 6 PM, etc.) and task coloring by type (pickup/drop).
- Improved operational planning and reduced manual routing efforts by over 30%.
- Enabled admin toggles for real-time control of driver visibility and dynamic task reassignments.
- Fetched customer/task data from Google Sheets via Apps Script for seamless syncing with the dashboard.
- Designed UI/UX for operational clarity allowing staff to manage 20+ orders daily with minimal training.

Freight Load Automation Chrome Extension

React.js, Google Apps Script, Chrome Storage, Google

Sheets API

- Developed a Chrome Extension to extract freight load data from the DAT website in real time.
- Enabled client and admin panels with secure login, background syncing, and sheet isolation for 10+ users.

- Replaced manual data entry with automated workflows, improving accuracy and saving 23 hours per day.
- All API flows were tested and validated using Postman for seamless backend integration.
- Implemented de-duplication logic using unique identifiers to avoid repeated load entries.
- Added dynamic sheet routing and multi-tab support for handling data from multiple clients simultaneously.

WhatsApp Order Chatbot for Laundry

Google Apps Script, WATI API, Google Sheets

- Created a conversational WhatsApp chatbot to automate customer onboarding, service selection, and order booking.
- Implemented API-based customer status check (new vs. existing) with dynamic routing for personalized flows.
- Collected and stored order details including name, service, and timeslot in Google Sheets in real time.
- Automated over 80% of customer interactions, reducing manual follow-ups and improving response consistency.
